

WHAT GOOD ROADS ARE DOING FOR WOMEN

Women and Automobiles Have Been Marked Boon Companions—(Level and Solid Roads Are Going to Place Sunshine and Good Air of the Country at the Feminine Driver's Pleasure at Every Day in the Week

"Who has said a word about what good roads are going to do for women," asks E. L. Holloway of the People's Garage, Lumberton, distributor for the Haynes "Light Six".

"We have had dinned in our ears that good roads are going to profit the general public by cutting hauling costs, vivifying the country, booming real estate values, but no one has so much as intimated that good roads have benefits in store particularly for women. They might well feel that they have been slighted.

"Women and automobiles have been marked as boon companions. A few women drove cars when they were cranked by hand. But since the advent of the self starter, and improved steering devises, the connections between milady and her automobile have been especially close, for women may now take their cars and go where they please, so long as streets and roads are good.

"There is no getting around the fact that the automobile has made a prettier, healthier and more self reliant woman. The woman driver today can thread through traffic expertly, and she is beating chaf-fuers at their own tricks in city driving.
